

POWERED BY NGA HUMAN RESOURCES

HR Admins Take Control of HR Process Dataflow with NGA HR Data Control Center

The NGA HR Data Control Central App moves HR data integration from an IT to a business procedure, making it more immediate and efficient. It simplifies the complex and time consuming integration required for HR processes across a heterogeneous landscape being different applications for Core HR, Payroll, Time, Benefits etc.

Removing this complexity and cost of HR dataflow, businesses can have the assurance that data will seamlessly integrate across even the most complex hybrid payroll landscapes. Application management support (AMS) is built into NGA HR Data Control Center to ensure ongoing high performance.

Removing complexity of integration

By removing the complexity of HR dataflow, it is easy for organizations with multiple payroll platforms to integrate data across even the most complex hybrid payroll landscapes.

NGA HR Data Control Center allows HR and Payroll admins to monitor and manage complex HR processes using the pre-built integration solutions. HR admins can easily follow the status of the HR processes via a simplified dashboard. This provides an overview of all the inbuilt integrations, and alerts to any issues or irregularities.

NGA HR Data Control Center is ideal for multi-country and/or payroll environments that are complex following the mergers of multiple businesses, and for organizations wanting the flexibility to select best-of-breed payroll platforms in each country.

This route is traditionally expensive due to the complexities of data transfer and the subsequent management and maintenance of the integrations. It is also costly to modify and can be liable to failures.

How NGA HR Data Control Center adds value:

- **Lower TCO of payroll.** Data integration costs cut by up to 70% by using pre-built and tested integrations, best practice templates and standard processes.
- **Pro-active issue and resolution management.** Teams focused on business delivery and not technical issues.
- **High payroll and HR compliance.** Real-time monitoring and alerts enable fast issue resolution without the need to raise IT tickets.
